

# ISO Systems in 7 Easy Steps...

## WE WORK WITH YOU...

QCS can help you to implement ISO 9001, ISO 14001 or OHSAS 18001 easily into your organisation.

Our approach is to help you to translate the ISO standard and then help you to implement a system into your business - not your business into the system.

## 7 EASY STEPS...

### Our unique approach includes:

- 1. Gap Analysis:** We capture what you already do & identify the gaps and then provide you with an easy to understand project plan that we can both work with.
- 2. System Documentation:** We produce a policy, manual and essential procedures to agree and implement this with you. We take no short cuts or 'off the shelf solutions... We work with you, listen to you and then tailor your documentation so that it works for you and is easy to understand and reflects what your working practice.
- 3. Procedures & Records:** We identify and produce drafts of key procedures and records for you to use.
- 4. Implementation:** Regular reviews makes sure that your project is on track and that the system is implemented into your business not your business into the system.
- 5. Awareness Training:** We will design and deliver a tailor made training course in your company so that everyone is aware of the system and how to use it.
- 6. System Auditing:** We can train you, or your team, or do your first round of audits for you to get your system
